- Mr. Sanjay Raut delivered the contents on the following topics

Your resume is often your first and best chance to get noticed by recruiters and hiring managers. Your goal is to make it easy for them to see that you have the qualifications they seek in an ideal candidate. Because they may be reading through hundreds of applications, a recruiter or hiring manager might quickly scan your resume to see if those qualifications jump out.

It's also important to note that online job applications are often sorted through software called an applicant tracking system. This software scans resumes and cover letters for relevant experience, skills and other keywords so that qualified candidates are easy for employers to identify.
